To whom it may concern,

The District of Saanich is seeking public input as part of developing a community-wide Zero Waste Strategy.

Community members are being invited to provide feedback via a survey that will help gauge residents' understanding and commitment to waste reduction, recycling, and composting. Your participation as an individual or household is critical as it will help us identify policies and actions that can address the needs and challenges in our community.

Royal Roads University graduate students are helping to administer the survey within the Saanich community in partial fulfillment of the requirements of their Royal Roads University course.

This letter confirms that the following students are supporting the District of Saanich in this work:

- **Meredith Wires**
- **Taremwa Sam Rwabwehare**

Survey information

The survey should take participants 5-10 minutes to complete, and it will be open until August 31, 2024. All responses are anonymous, and a preliminary survey results report will be published in the fall.

Thank you for your time and participation,

Rebecca Newlove
Manager of Sustainability
